Weatherization

MAKE YOUR BUSINESS MORE ENERGY EFFICIENT

Columbia River PUD's weatherization program will help you make energy efficiency improvements to your existing facility. This guide will give you the information you need to start your own weatherization project.

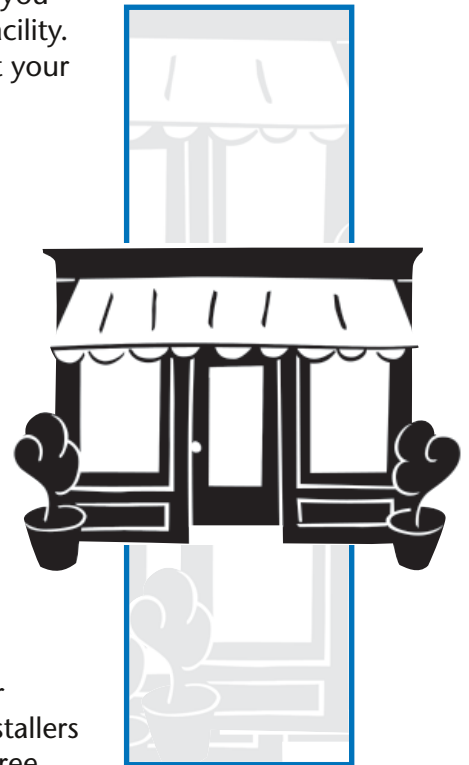

Eligible Customers

This program is available to commercial customers who receive electric service from Columbia River PUD. Eligible facilities include office or retail spaces that are less than 5,000 square feet in size and are heated by permanently installed electric heat (electric furnace, wall heaters, heat pump, baseboard heat, etc.).

Step-by-Step Work Flow

1. Request a free energy analysis from our Energy Experts. *To qualify for a rebate, we must complete this analysis before any measures are installed.*
2. We will provide a list of weatherization improvements that could be made to your facility and the estimated financial incentives that could result.
3. If this will be a "Do-It-Yourself"* project, you should now assemble costs for materials. Otherwise, you will need to request bids from weatherization installers for the recommended improvements. We advise that you obtain two or three bids, if possible.
4. Submit the project application to us for approval.
5. Authorize the weatherization installers to do the job, or purchase the materials and complete the work yourself.
6. Notify the PUD when the work has been completed. Provide a copy of your statement/invoice identifying the completed work, or receipts showing the materials costs if it is a "Do-It-Yourself" job.
7. We will perform a final quality assurance inspection.
8. Upon completion of a satisfactory final inspection, the PUD will provide rebate funds to you. Rebates under \$150 will be applied to your electric account. For rebates of \$150 or greater, you may choose to either apply the amount to your electric account or receive a check.

* If work is completed by an unlicensed contractor, the job will be considered "Do-It-Yourself" and rebates from the PUD will apply to materials costs only.
