

Duct Sealing

Program & Rebate Information

P E R F O R M A N C E T E S T E D D U C T S Y S T E M S

Columbia River PUD's duct sealing program provides consultation, quality assurance and financial assistance to PUD customers. The program aims to maximize the efficient use of electricity and can improve indoor air quality.

Eligibility Requirements

- Columbia River PUD must be your electric service provider.
- You must heat your home with a forced air electric furnace or heat pump system.
- Your home may be a site-built dwelling or a manufactured home.
- A Performance Tested Comfort Systems (PTCS) Certified Residential Air Distribution Systems Technician must complete the work.

About Performance Testing

Performance testing is a procedure that ensures the integrity of your duct system. Your duct system will be tested, sealed and retested to ensure that a qualifying level of leakage reduction is achieved. This process will help lower your heating and cooling costs while improving your home's comfort and safety.

Incentives

Quality Assurance - PTCS Certified Technicians will use diagnostic testing methods to ensure quality results. PTCS technicians have been trained to identify duct system problems and ways to fix them.

Rebates - We offer a \$400 rebate to customers who have their duct systems sealed and certified by a PTCS Certified Technician. This rebate may not be combined with the PUD's air source/geothermal heat pump rebate program.

Tax Credits - Oregon tax credits may be available; visit www.oregon.gov/energy or call (800) 221-8035 for details.

Leaky or disconnected ducts can cause uncomfortable drafts and indoor air quality problems while increasing heating and cooling costs.

Properly sealed ducts will make your home more comfortable, and increase the efficiency of your forced air heating and cooling system.

updated 02-11-11

Step-by-Step Process

1. Contact us at (503) 366-5470 or experts@crpud.org to arrange for a home consultation.
2. We will inspect your duct system to determine whether it is a good candidate for the program.
3. If the system needs to be sealed, contact PTCS certified contractors for price quotes.
4. Select a contractor and authorize them to perform the work.
5. Upon completion, the contractor will submit documentation to us for approval.
6. We will contact you to arrange for a quality assurance visit.
7. We will process your rebate within three weeks of a satisfactory final inspection.

PTCS Certified Contractor List

The following PTCS contractors have been certified to test and seal residential air distribution systems to our rigorous set of specifications. These specifications are designed to result in high quality, energy-efficient, comfortable and healthy home comfort systems.
