

# Cut energy waste, lower your bill, Improve air quality.

**Seal your ducts** to cut your energy bills, and eliminate uncomfortable drafts and air quality problems in your home.

## Be Comfortable Year-Round

Add comfort to your home. Sealing ducts can help with rooms that are too hot in the summer or too cold in the winter.

## Breathe Better Air

Seal ducts to reduce the risk of dust and allergens entering your home.

## Cut Energy Waste

Don't waste money heating and cooling empty spaces. Leaky ducts can cause energy to escape in places like crawl spaces. Duct sealing finds and repairs these leaks.

## New Systems Need Sealed Ducts Too

Are you installing a new heating system? Seal your ducts to help it perform better.

## Lower Your Bills

Leaky ducts can increase heating and cooling costs by as much as 20%. Seal them up to lower your bills.

*Program is limited to available funding and may change without notice.*

We partner with Efficiency Services Group to bring you this rebate program.

Efficiency Services Group Contact Info:

Phone: (888) 883-9879 • Email: [rebates@esgroupllc.com](mailto:rebates@esgroupllc.com)

## Rebates Available

We offer a \$250 rebate for duct sealing in site-built homes and a \$200 rebate for duct sealing in manufactured homes.

## Eligibility

- All residential PUD customers with forced air electric furnaces or heat pumps are eligible.
- Homes may be site-built, manufactured, or floating homes.
- Duct sealing projects must be completed by a Performance Tested Comfort Systems (PTCS) technician.

## Get Started Today

We partner with Efficiency Services Group to bring you this rebate program. Call Efficiency Services Group at **(888) 883-9879** or email [rebates@esgroupllc.com](mailto:rebates@esgroupllc.com) to start your project.

## Project Steps

- 1. Have your ducts inspected.** Contact Efficiency Services Group at **(888) 883-9879** or [rebates@esgroupllc.com](mailto:rebates@esgroupllc.com) to arrange for a home consultation. They will inspect your ducts and tell you if sealing them might be helpful.
- 2. Get quotes.** If the system needs to be sealed, contact a PTCS certified contractor for price quotes. Visit [crpud.net/contractors](http://crpud.net/contractors) for a list of local duct sealing contractors.
- 3. Complete the work.** Select a contractor and authorize them to perform the work.
- 4. Have a follow-up visit.** When the work is done, the contractor will submit documentation to us for approval. We will contact you to arrange for a quality assurance visit.
- 5. Receive your rebate.** We will process your rebate within 3-4 weeks of completing the quality assurance visit and receiving all required paperwork.
