

Wash & dry your clothes With less waste.

Lower your monthly utility bills with energy-efficient **clothes washers and dryers**, which use less electricity and water.

Cut Energy Waste

Use 25% less energy and 45% less water than a regular clothes washer or dryer by switching to an ENERGY STAR® qualified model. When your clothes are dry, moisture sensors in the dryer automatically shut them off.

Keep Your Clothes Longer

Put less wear and tear on your clothes with ENERGY STAR qualified front-loading models. They do not have agitators.

Eligibility

Visit energystar.gov for a complete list of ENERGY STAR qualified appliances. Rebates are available to all PUD customers. Qualified appliances can be installed in any home or business served by the PUD.

Get Started Today

We partner with Efficiency Services Group to bring you this rebate program. Call Efficiency Services Group at **(888) 883-9879** or email rebates@esgroupllc.com to start your project.

Program is limited to available funding and may change without notice.
