

Your home, your heat, Your comfort.

Upgrade your **windows and insulation** to maximize your energy use.

Seal In Savings

Upgrade your windows and add insulation to help keep heat in during the winter and out in the summer. This cuts energy waste, which lowers your power bills all year long.

Keep Comfortable

New windows and insulation will help eliminate drafts, and keep the temperature in your home comfortable year-round.

Get Started Today

We partner with Efficiency Services Group to bring you this rebate program. Call Efficiency Services Group at **(888) 883-9879** or email rebates@esgroupllc.com to set up a free weatherization audit. This audit is for customers with electric heat and takes about an hour.

"Weatherizing our home was a good investment for us,"

- Chip B., Warren

Program is limited to available funding and may change without notice.

Eligibility Requirements

- You are a PUD residential customer with electric heat.
- Your home may be an existing site-built dwelling, manufactured home, or floating home. It may be your residence or a rental.
- We must complete a home energy audit before your upgrade begins and an inspection after it is complete. Both visits are needed for you to receive PUD rebates.
- If you are a renter, please have the homeowner contact us.

How Weatherization Rebates are Calculated

Insulation rebates are calculated using the square footage of the area to be insulated and the rebate per square foot. Only uninsulated areas are eligible for the rebate.

Window rebates are calculated using the square footage of the window area being replaced. Attic insulation of at least R-19 is required.

Step-By-Step Process

- 1. Complete a home energy review.** Contact Efficiency Services Group at **(888) 883-9879** or rebates@esgroupllc.com to arrange for a home consultation. The homeowner must be present.
- 2. Request quotes.** If you plan to have a contractor do the work, provide them with the list of recommended improvements following the home energy review. Find a list of local contractors at crpud.net/contractors. *If the work is not done by a licensed contractor, it will be considered do-it-yourself. Rebates will apply only to the cost of materials.*
- 3. Do the work.** Complete your project.
- 4. Pass inspection and provide paperwork.** Notify us when your project is complete. We will complete a quality assurance inspection, and ask you for a copy of the invoice from your contractor. For do-it-yourself projects, we will request receipts for materials.
- 5. Receive your rebate.** We will process your rebate within 3-4 weeks of the inspection and receiving all required paperwork.
