

Thermostat Replacement for Zonal Heating Systems

We partner with Efficiency Services Group to bring you this rebate program.

Contact Efficiency Services Group at (888) 883-9879 or rebates@esgroup.com.

Rebate Application & Information

EFFICIENCY IMPROVEMENTS FOR YOUR HOME

Line-voltage thermostats are used for zonal electric heating systems such as baseboards, wall heaters and ceiling cable. Energy-efficient electronic thermostats are more accurate than mechanical thermostats and result in more even air temperature, increased comfort and less energy waste.

Eligibility

This program is available to residential PUD customers who meet the following requirements:

- Your primary heat source is some type of permanently installed zonal electric heat, such as wall heaters, baseboards, or ceiling cable.
- You are replacing all existing mechanical thermostats, except those in bathrooms, with new electronic thermostats that meet the specifications on the rebate application form.

Rebate

We offer a rebate of \$18 per thermostat when you replace a line-voltage mechanical thermostat in your home with a qualifying electronic thermostat. We will apply your rebate directly to your utility account within 3-4 weeks of a satisfactory inspection.

Step-By-Step Process

Replacing thermostats is inherently dangerous. Failure to follow electrical codes and safety instructions may result in fire or severe injury.

Do It Yourself - To install the thermostats yourself, make sure your new model meets the program specifications on the rebate application form. After the installation, call Efficiency Services Group to schedule an inspection. Please keep your old thermostats until after our inspection. You will need a copy of your receipt and a completed Rebate Application.

Hire An Electrician - Contact one or more electricians to request a quote for the work to be done. Make sure your electrician installs qualifying thermostats. After the installation, call Efficiency Services Group to schedule an inspection. Please keep your old thermostats until after our inspection. You will need a copy of the electrician's invoice and a completed Rebate Application.

**This list of local electricians is provided as a courtesy and is not an endorsement of their company. You are not required to use one of these electricians in order to qualify for a rebate.*
